

MOHAMED MAGDY ELKOMY

Front-End Developer | React.js | Vite

+201272782474 | mohamedmagdyelkomy53@gmail.com | Cairo, Egypt | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Front-End Developer delivering 20+ scalable React applications for client-facing web platforms at Brmja Tech — including multilingual landing pages, e-commerce frontends, and a 9-language tourism marketplace. Specialized in legacy code refactoring (audited and stabilized 37+ files across an inherited production codebase), internationalization (RTL/LTR), and component-based architecture with Redux Toolkit. Computer Science graduate with cross-platform mobile (Flutter) and applied AI background — focused on writing clean, maintainable, and user-centric interfaces.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python, C

Frameworks & Libraries: React.js 19, React Router, Redux Toolkit, Redux Thunk, Context API, i18next, Framer Motion

Styling & UI: Tailwind CSS, Bootstrap 5, CSS Modules, shadcn/ui, Responsive Design, RTL/LTR Layouts

Build & Tooling: Vite, npm, Git, GitHub, VS Code, ESLint, Figma

APIs & Backend: REST APIs, Firebase, Firestore, Strapi, MySQL

Architecture & Concepts: Component-Based Architecture, Clean Code, State Management, Internationalization (i18n), Code Auditing & Refactoring

Workflow: Git Flow, Pull Requests, Code Review, Vercel CI/CD, Cross-browser Testing, Browser DevTools

Deployment & Other: Vercel, GitHub Pages, Cross-Platform Mobile (Flutter), Introductory AI (TensorFlow, Keras)

PROFESSIONAL EXPERIENCE

Front-End Developer (React.js) | *Brmja Tech — Maadi, Cairo*

Dec 2025 – Present

- Build production-grade React applications for client-facing projects across diverse industries — waste management, e-commerce, tourism, healthcare, B2B catalogs, fashion, Islamic education, and grocery delivery.
- Delivered 20+ bilingual (Arabic / English) landing pages and frontends with full RTL & LTR support — built with React 19, Vite, i18next, Tailwind CSS, shadcn/ui, and Framer Motion; all deployed to production via Vercel.
- Built FIX Store v2 — a full e-commerce frontend featuring Redux Toolkit architecture, product variant renderers (color swatches, pill selectors), AutoScroll carousel hooks, and a ProductModal bottom sheet.
- Audited and refactored MyTours, a 9-language tourism & rental platform inherited from a departed developer — resolving critical bugs across 37+ files (authentication, storage layer, production build issues) and introducing shared utilities, an Error Boundary, animated page transitions, and shimmer skeleton loaders.
- Extended and maintained ongoing client landing pages handed off from teammates (e.g., Faya), ensuring design and code consistency with the existing codebase.
- Built reusable component libraries and developer tooling (browser/iPhone mockups, Behance case study builder with html2canvas export) used across multiple projects; collaborated via Git/GitHub on a fast-paced delivery cycle from design hand-off to production.

Front-End Development Intern | *Eraasoft Training Center — Cairo*

Dec 2024 – May 2025

- Completed a structured front-end development program covering HTML, CSS, JavaScript, Bootstrap, and React.js with Vite as the build tool.
- Delivered a capstone e-commerce frontend project modeled after leading retailers (Amazon, Noon), focusing on responsive design and reusable component patterns.

Flutter Development Trainee | *Route IT Academy — Cairo*

Jul 2023 – Nov 2023

- Built cross-platform mobile applications using Flutter, integrating Firebase Authentication, Cloud Firestore, and Google Maps services.
- Applied Clean Architecture principles with BLoC and Provider state management; deployed apps to the Google Play Store with CI/CD pipelines and dependency injection.

AI Research Trainee | *Zewail City of Science and Technology — Cairo*

Aug 2023 – Oct 2023

- Engineered and trained five machine learning models in Python using TensorFlow for classification and prediction tasks; improved model performance by ~15% through advanced data preprocessing and feature engineering.
- Collaborated with multidisciplinary research teams to process datasets exceeding 1 TB across multiple domains.

Embedded Systems Trainee | *Information Technology Institute (ITI) — Cairo*

Aug 2022 – Sep 2022

- Developed low-level C programs for microcontroller peripherals (digital I/O, LCDs, DC motors, hardware timers) and implemented core communication protocols (UART, I2C, SPI, CAN, LIN); gained hands-on RTOS experience.

FEATURED PROJECTS

MyTours — 9-Language Tourism & Rental Platform — *React 19 · Vite 6 · Bootstrap 5 · i18next*

- Inherited and stabilized a large legacy codebase: identified 37+ files using broken auth headers, fixed an OTP flow tied to the wrong localStorage key, eliminated 16+ window.location.reload() calls, and removed 17 duplicate ToastContainers.
- Introduced a shared storage utility, Error Boundary, travel-themed PageTransition component, shimmer skeleton loaders, and a custom 404 page; produced a professional PDF QA/testing guide for the team.

Live: mytourshub.com

FIX Store v2 — E-commerce Frontend — *React · Redux Toolkit · Embla Carousel · Vercel*

- Built a full e-commerce frontend with Redux Toolkit architecture, product detail pages, variant renderers (color swatches, pill selectors), AutoScroll carousel hooks, and a ProductModal bottom sheet.
- Debugged and resolved Vercel deployment issues including vite dependency placement and stale build cache.

Live: fix-store.vercel.app

Face Aging System — Graduation Project — *Python · TensorFlow · Keras · OpenCV · GANs*

- Developed a Generative Adversarial Network (GAN) to synthetically age human facial images; covered the full ML pipeline from preprocessing to model evaluation.

SELECTED CLIENT WORK — LIVE PRODUCTION DEPLOYMENTS

A curated selection of bilingual landing pages and frontends delivered at Brmja Tech. All listed projects are publicly deployed; source code is private due to client IP.

- **ElKoptan** — Waste Management & Recycling | *React · TypeScript · Tailwind · Framer Motion* | captain-s-scrap-hub.vercel.app
- **YourZ** — Beauty / Fashion Marketplace | *React · Tailwind · shadcn/ui · Framer Motion* | yourz-launchpad.vercel.app
- **Sianko** — Service & Maintenance SaaS | *React · Vite · Tailwind* | sianko-landing-seven.vercel.app
- **Raw-Chem** — B2B Chemicals Catalog | *React · Vite · CSS Modules · React Router* | rawchem-landing.vercel.app
- **Muslim Academy** — Islamic EdTech Platform | *React · Vite · Tailwind · Framer Motion* | muslim-academy-landing.vercel.app
- **Hyper One Kilo** — Grocery Delivery Brand | *React · Vite · Tailwind · React Router* | hyper-one-kilo-v2.vercel.app
- **SheGo** — Home Medical Services (RTL) | *React · Vite · Tailwind · i18next* | landing-she-go.vercel.app

+ 14 additional landing pages across automotive, real estate, education, and B2B sectors — available in portfolio.

EDUCATION

B.Sc. in Computer Science | Modern University for Technology and Information (MTI), Cairo Sep 2020 – Jul 2024

TRAINING & CERTIFICATIONS

- **Front-End Development Diploma** — Eraasoft Academy (2024 – 2025)
- **Flutter Development Diploma** — Route IT Training Center (2023)
- **Embedded Systems Course (156 hours)** — Information Technology Institute (ITI) (2022)
- **Introduction to Artificial Intelligence & Applications** — Zewail City of Science and Technology (2023)

LANGUAGES & SOFT SKILLS

Arabic: Native · **English:** Intermediate — strong reading & writing for technical documentation

Communication · Problem Solving · Analytical Thinking · Attention to Detail · Team Collaboration · Adaptability · Continuous Learning · Time Management · Ownership
